DETAILED ACTION

Response to Amendment

1. The amendment filed on October 4, 2006 (Remarks on pages 7-10) overcomes the rejection made in the previous office action under 35 U.S.C. 112 1st paragraph.

Allowable Subject Matter

2. Claims 1-8 and 10-19 are allowed and re-numbered from 1-18.

3. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method of reading out an electronic image sensor that is subdivided into image points and wherefrom image points or groups of image points can be read out with a predetermined clock period, and organized into at least two quantities of image points and/or groups of image points whose elements can be read out at different scanning rates as disclosed in claim 1. The claimed invention distinguishes over the prior art by the manner in which the prolonged integration of an exposure in the (ROI) results in an improved local signal-to-noise ratio (SNR) and a higher image quality in the region outside of the region of interest ROI. The claimed combination allows for improving a method of reading out an electronic image sensor that is subdivided into image points.

This type of method is conventional in the art. However, the prior art of record fails to teach selecting a ROI of the sensor for which the desired temporal resolution of the image is higher than that for a region outside the ROI of the sensor; collecting image information from the region outside the ROI for reading at a later stage; and separately reading each of the image points to provide an image, wherein the quantities of image points and/or groups of image points in the selected region are read out at a higher scanning rate than the scanning rate for quantities of image points and/or groups of image points in the region outside the ROI, and wherein a prolonged integration of an exposure in the region outside the ROI results in an improved local SNR and a higher image quality in the region outside the ROI

These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims 2-7, 10-13 and 15-19 are allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
